

Overview

It is Campus Management Software, developed for an Australian client. It is flexible and scalable, making it suitable for organizations of all sizes to manage and automate their administrative and academic activities.

This platform operates under a subscription-based software-as-a-service (SaaS) model, whereby institutions pay a monthly or annual fee for access to the system's features such as course scheduling, registration, fee collection, attendance tracking, grading, and data analytics.

Through this web-based platform, faculty, staff, and administrators can easily access information and perform tasks online, resulting in streamlined workflow processes, and enhanced data accuracy and analysis.

The system enhances communication between students, faculty, staff, and administrators, providing a centralized platform for announcements, messaging, and updates.

Core Features

- ★ **Manage Subscription:** Shows the current plan and the organization admin can update the subscription plan for organization, SMS, and Email.
- ★ **Organization/Institute Dashboard:** Showing the stats such as the number of students, Teachers, Admins, Alumni, Fee and Invoicing details, etc.
